## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1, 3-13, 15-20 and 22 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to teach a system having a decoding device including two signal adding means for receiving coefficient values and adding a least one value which is a transform of the difference between two predictive values to the coefficient value in order to generate a second set of coefficient values, a decoding means for receiving the coefficient values from the adding means and which transforms and transmits the second set of coefficient values, and a signal adding means for receiving the coefficients generated by the decoding means which generates a third set of coefficient values used to reconstruct an approximate version of an encoded signal, as recited in claims 1, 4, 9 and 16.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
